

# BLUE1BOX

*Blue1USA is proud to introduce our non-insulated, 1,000 gallon, economy model DEF storage and dispensing system called the Blue1Box.*

This Blue1Box is the perfect solution for the commercial fleet owner who wants to purchase DEF in bulk. This economical DEF storage and dispensing mini-bulk provides an attractive combination of quality and price.

The Blue1Box is engineered to the highest industry standards and include many of the same proven, quality features as in our insulated Mini-bulk systems. Every Blue1Box meets both ISO 22241 and PEI RP1100 standards for the storage and dispensing of diesel exhaust fluid (DEF). These cost effective systems will fit into any equipment budget.

- **NARROW, COMPACT FOOTPRINT**

Compact footprint (46"x95") allows for the unit to be installed on most fuel islands or other productive fueling areas with space constraints.

- **NON-INSULATED**

The molded HDPE exterior shell is perfect for warm weather locations and also provides important secondary containment.

- **PRE-WIRED, TURN-KEY COMPONENTS**

Provides quick and easy installation. Every unit includes stainless steel piping & dry-break adapter, magnetic nozzle w/ auto shutoff, swivel/breakaway, inventory level gauge and audible overfill alarm.

Two models are available to fit any budget. The Standard model includes a 15 ft hose and hose hanger. The Premium model includes a 25 ft. hose, retractable hose reel and pulse output.
